

WAN NUR ADILA

MOBILE & CROSS-PLATFORM ENGINEER

Dengkil, Sepang, Malaysia • +60 17-496-5840 • wanadila94@yahoo.com • [LinkedIn](#) • [GitHub](#)

SUMMARY

Mobile and cross-platform engineer with 7+ years shipping production Flutter, React Native, and React applications across creator-economy, government, and enterprise products. Strong in TypeScript and Dart, deployment automation with Codemagic, and end-to-end testing with Playwright. Comfortable owning features from spec to store release and reviewing code across mobile and web teams.

WORK EXPERIENCE

Application Developer *Nov 2024 – Present*

Ukuya Sdn Bhd

- Maintain and extend client web applications, integrating new features into existing codebases and ensuring backward compatibility across releases
- Built Playwright E2E test suites covering all critical user flows, reducing manual QA time and catching regressions before production
- Review pull requests from teammates, focusing on TypeScript correctness and consistent component patterns

Senior Front-End Engineer *Jul 2022 – Oct 2024*

Xamble Technologies Sdn Bhd

- Owned the Flutter codebase for Xamble's flagship influencer platform serving 2K creators across iOS and Android, shipping consistent updates from beta through live production
- Defined state management architecture (Bloc), folder structure, and CI/CD standards adopted across 2 internal projects
- Prototyped experimental features and explored new technologies to support product roadmap discussions
- Reviewed pull requests across the mobile team, providing feedback on Flutter patterns and code quality

Front-End Engineer *May 2019 – Jun 2022*

Redsquare Software Sdn Bhd

- Built **Rakita** and **MyBelia** from project initiation through delivery and client handover, developing the full front-end on React.js and Flutter
- Collaborated with backend, design, and PM teams to ship 4 features per quarter.
- Set up project foundations, including folder structure, component patterns, and integration with backend APIs

Junior Programmer *Oct 2018 – Apr 2019*

Sprintla Sdn Bhd

- Maintained React Native and React.js applications across 500 client projects
- Published and managed releases on Google Play and Apple App Store, including provisioning, signing, and store listing updates
- Worked with PMs to scope and deliver feature roadmaps in tight cycles

Junior Developer *Jun 2017 – Sep 2018*

Datum Clearmind Sdn Bhd

- Developed Android applications using the Ionic Framework for enterprise clients
- Improved existing application workflows and participated in QA and performance optimization

SKILLS

Primary	Flutter (Dart), TypeScript, React Native
Also strong in	React.js, Vue.js, JavaScript
State & Data	Bloc, Riverpod, Provider, GraphQL, REST, Firebase
Testing & Delivery	Playwright (E2E), Codemagic, App Store & Play Store publishing
Practices	Code review, CI/CD pipelines, cross-platform architecture, mentoring

EDUCATION

Universiti Kuala Lumpur — Bachelor of Computer System Security *2013 – 2017*
